SUMMARY

Motivated Computer Science graduate with strong expertise in Data Science, AI/ML, and backend development. Skilled in building scalable data-driven applications, predictive models, and RESTful APIs. Experienced in Python programming, data analytics, visualization, and machine learning. Quick learner with strong problem-solving abilities, capable of contributing independently or in team environments.

TECHNICAL SKILLS

- Programming & ML: Python, SQL, C, Data Structures & Algorithms, AI/ML (Regression, Classification, RAG, LLM, NLP, Basics of Deep Learning)
- Data Analytics & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, Data Cleaning, EDA
- Backend & Cloud: Django, REST API, JWT Authentication, Microservices (Basics), AWS (EC2, S3, RDS, IAM, ECR), CI/CD
- Frontend: HTML5, CSS3, Tailwind, React.js, Next.js, React Native (Basics)
- Databases: MySQL, PostgreSQL, SQL Server, MongoDB
- Tools & Others: Agile, Unit Testing, Data Warehousing, Cloudinary

PROFESSIONAL EXPERIENCE

Numetry Technologies: Software Development Trainee

Mar 2024 – Aug 2024

- Developed scalable backend applications using Django, implementing REST APIs, JWT authentication, and role-based permissions. Built reusable modules and proof-of-concept AI/ML integrations for faster development and data-driven features.

PROJECTS

- Social Media Backend: Built a scalable social media backend with Django, including JWT authentication, user profiles, posts, and follow/like features. Optimized APIs and role-based permissions for smooth frontend integration and real-time user interaction.
- E-commerce Platform: Developed a full-stack e-commerce system with product listing, cart, checkout, orders, and admin management using Django REST. Implemented secure authentication, optimized REST APIs, and a smooth React frontend for a complete shopping workflow.
- Banking System: Created a secure banking backend supporting deposits, withdrawals, fund transfers, and full transaction history.
- Enhanced performance with optimized APIs, role-based permissions, and responsive frontend integration.
- Movie Review Sentiment Analysis (NLP): Built a sentiment analysis model using Python, NLTK, TF-IDF, and Naive Bayes to classify reviews as positive or negative.
- Customer Churn Prediction (ML): Predicted customer churn using machine learning models like logistic regression and Random Forest.
- Performed EDA, feature engineering, and data visualization to generate actionable business insights.

EDUCATION

B.Tech

2020 - 2024

Biju Patnaik University of Technology

- Department of Computer Science and Engineering. Equivalent CGPA: 8.27 CGPA
